ABOUT US

The Italian brand synonymous with quality and innovation whilst respecting the environment

Biosigma was founded in 1988 and is located near Venice. Our headquarters extend over 12,000 square metres, where we produce some of the many items in our catalogues. The production, equipped with sophisticated machinery, innovative automation and two clean rooms, is designed to guarantee products free from human and bacterial DNA, DNases, RNases, bacterial endotoxins, PCR and ATP inhibitors.

Thanks to our advanced computer system, the sales office is able to provide rapid and detailed answers to our customers. Our constant commitment to technological development has allowed Biosigma to offer a service increasingly oriented towards customer satisfaction, with shipments in Italy that are guaranteed delivery times of 3 to 5 days.

Our products are distributed in over 50 countries worldwide, both directly from our warehouses and through our national and international distributors. In August 2011, Dominique Dutscher SAS acquired the majority of our share capital. Dominique Dutscher SAS is a leading French group in the distribution of consumables and equipment for life sciences and biotechnology.

Our website, www.biosigma.com, offers over 100,000 items from more than 140 renowned brands, complete with descriptions and technical sheets. We also offer numerous products on the Mepa portal (Italian online purchases for the public administration).

Biosigma continues to operate under its own name as an independent company, maintaining its philosophy of attentiveness towards customer needs, but benefiting from the strength of a group that possesses one of the largest European stocks of consumables and scientific instrumentation. Our sales network in Italy is made up of young biotechnologists who cover the entire national territory, including its islands. In addition, a director of research is available at the company to answer technical-application questions from customers as is a biologist responsible for the internal laboratory.

Dutscher Europe, the strength of a group

- One of the largest stocks of consumables and scientific instruments in Europe
- A fast, accurate logistics service, suitable for all customers
- A technical-commercial team close to you for advice
- A complete and intuitive catalogue and website, high-performance e-business tools
- Strong values of respect and pursuit of excellence
- Continuous research into new high-quality products

SUSTAINABILITY

Our commitment to sustainable development and environmental protection

Photovoltaic systems

Since 2011, Biosigma has installed a photovoltaic system that now generates 740,000 kWh per year and prevents the emission of 450,000 kg CO₂ per year.

ISO 14001

Biosigma has successfully kept its UNI EN ISO 14001 environmental certification since 2013.

Treedom

Treedom® is the first platform in the world that allows you to plant a tree remotely and follow the history of the project online. Through this platform, Biosigma has already planted 500 trees in different areas of the world.

CONAI

Biosigma is a member of CONAI, a private non-profit consortium created to increase packaging recovery and recycling.

ISCC

Biosigma is ISCC Plus certified, a voluntary process applicable to the bioeconomy and to the circular economy for food, feed, chemical products, plastic, packaging, textile products and renewable raw materials derived from a process that uses sustainable energy sources.

ESG

Biosigma is working to adopt the ESG (Environmental, Social and Governance) criteria; these are three fundamental dimensions to verify, measure and control the Company's commitment to sustainability. This involves adopting measures to reduce pollution, CO₂ emissions and waste. It also means having a diverse and inclusive workforce, from entry into the company to the board of directors.

SUSTAINABILITY PARTNER

Ogyre

We directly support Ogyre in the Fishing for litter project. Ogyre supports fishing communities by providing funding that allows them to recover waste from the sea during normal fishing operations. The waste collected is then gathered, separated and disposed of correctly.

E-Bike

In 2023 we started a sustainability project that provides some e-bikes to employees for home-work travel. The goal is to reduce air pollution and traffic congestion, promoting the culture of sustainable mobility and the use of zero-impact means of transport for daily travel.

CERTIFICATIONS

"Biosigma has always been focused on the safety and quality of its work by achieving the most important certifications"

ISO 13485

The quality system certificate demonstrates and promotes the company's commitment to organisational policies aimed at providing products and services in line with the regulatory and market requirements related to the medical field.

ISO 14001

ISO 14001 is a tool that will allow the organization to manage the environmental impacts of its activities in accordance with the applicable law, continuous improvement, from a pro-active attitude towards environmental issues.

ISO 45001

The certification represents the first international standard for health and safety at work or occupational safety. It has the ultimate goal of helping companies provide a healthy and safe working environment for their employees and for all those who are present at workplaces. This goal can be achieved by controlling and mitigating all factors that are harmful or represent a danger to the physical and/or mental well-being of workers.

FDA - Registration Number: 3002945499

The manufacturing plant and the Biosigma IVD devices are registered with the FDA (Food and Drug Administration).

We prefer Green

- The energy purchased, net of that self-produced by photovoltaic means, is 100% produced from renewable sources
- 90% of the packaging used to package our products is FSC "Forest Stewardship Council" certified, therefore originating from raw materials deriving from responsibly managed forests
- Catalogues printed on recycled and recyclable paper, wood-based, a renewable resource and using non-toxic inks
- 6 parking spaces with free electric charging station available to all
- Greener items: less plastic, reduced packaging, recyclable packaging, equipment with lower electricity consumption, recyclable waste, easily repairable equipment, etc... At the same time, we select and favour products with these characteristics; these items are identifiable by their Go-Green logo in our catalogues and on www.biosigma.com
- 100% LED lighting in our factory

Other initiatives for the environment

Biosigma's internal laboratory guarantees quality control of the items produced and distributed by the company, satisfying rigorous regulatory and internal requirements.

The laboratory manager uses advanced Molecular Biology, Biochemistry and Microbiology methodologies to assess the purity of the products and issue certificates of conformity.

The "quality control" protocols adopted are extremely scrupulous and scientifically validated with stringent parameters, recognised by the international scientific community.

Every production batch undergoes a rigorous sampling and analysis process, ensuring compliance with specific standards and the safety of the production lines.

The strict application of these methods not only allows complying with current regulations, but also forestalling and preventing any non-compliance before distribution.

Thanks to this methodical and rigorous approach, Biosigma ensures the highest quality and safety of its products, confirming its excellence in the sector.

OUR BRANDS

CLEARLine®

CLEARLine® is a trademark registered by Biosigma, synonymous with purity, cleanliness and safety

Thanks to the use of high-quality raw materials and to constant controls during production, the articles in the CLEARLine® range are ideal for various laboratory applications.

Compliant products, with rigorous quality standards; the purity of the products is certified by our internal laboratory for each batch.

Registered trademark identifying the CLEARLine® products manufactured by Biosigma

Biosigma Registered trademark identifying the line of products derived from renewable sources and certified ISCC PLUS and ACT Label

CLEARLock®

Biosigma registered trademark identifying the microtubes with safety closure

CRYOGen®

Biosigma registered trademark identifying the test tubes for cryogenics

FAST READ®

Biosigma registered trademark identifying the cell counting chamber for urine sediment sample

M-T MICROTIPS®

Biosigma registered trademark identifying the triple bulb pipette for the preparation of the urine sediment sample

HP PETTE®

Biosigma registered trademark identifying the micropipettes for dispensing liquids with fixed and variable volume

BIOBased CLEARLine® products

Conventional plastics, especially those from non-renewable sources, pose a challenge to the environment due to their limited biodegradability.

Laboratories can mitigate their impact by integrating bio-based materials and adopting environmentally friendly practices that minimize their plastic footprint.

Biosigma, committed to innovation and sustainability, has embraced the Mass Balance Model, integrating circular feedstocks into its production facilities.

As a pioneer in innovation, Biosigma introduces the **BIOBased CLEARLine®** products, which are manufactured with at least 90% certified plastic from bio-based raw materials.

During this process, the properties of the polymer and the product remain compliant with the existing specifications. Such a sustainable approach not only preserves product integrity, but also contributes to significant emission savings, in line with our commitment to a greener future.

The commitment to sustainability is also evident in the choice of feedstocks, which are derived from renewable sources such as agricultural residues, food waste, and other organic by-products.

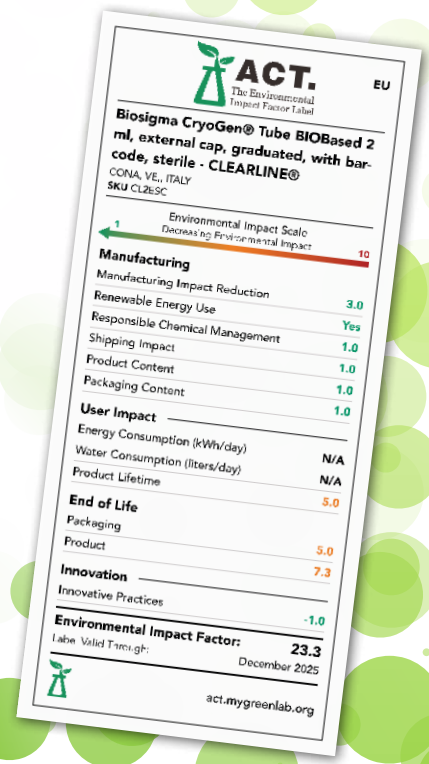

These materials are not only environmentally friendly, but also have **ISCC Plus** certification as Bio and Bio-circular products. The sustainability criteria and the entire process are certified by the International Sustainability and Carbon Certification (ISCC) organization.

“ISCC – International Sustainability and Carbon Certification (ISCC) is an independent certification system that ensures compliance with high environmental and social sustainability requirements, the reduction of greenhouse gas emissions and traceability throughout the supply chain.”

In addition, all **BIOBased CLEARLine®** products have the ACT Environmental Impact Factor Label awarded by an independent auditor and published by My Green Lab® <https://act.mygreenlab.org/>

The ACT (Accountability, Consistency, and Transparency) label provides clear, accurate, fair, and greenwash-free information on environmental impact in all areas, including manufacturing, energy and water use, packaging, and end-of-life.

BIOBased 1D CryoGen® Tubes CLEARLine®

CLEARLine®

- Tubes in Polypropylene - caps in Polypropylene and TPV, from medical grade raw materials
- Zip bags, re-closable
- Innovative screw caps eliminate leakage and contamination
- Standard code 128 barcode unique and unrepeatable
- Storage temperature Range: from +4°C to liquid nitrogen vapor phase
- Particularly suitable for cell culture, microbiology, and other long-term storage samples
- Sterile SAL 10-6*
- Certified IATA PI650
- Certified free of Human DNA, DNase, RNase, Endotoxins, ATP and PCR inhibitors*
- No traces of metals found within the detection limits

* Certificate of analysis available for download on www.biosigma.com

Securdrop	81
DIFF-SAFE® Blood Dispenser	81
Breaklot stick	81
Blood grouping strips	81
Immunology plates	81
Box for 4 blood grouping strips	81
Microplate sealing film	81

1.1. SAMPLE STORAGE

Biosigma offers a complete range of cryogenic tubes and boxes for the preservation of samples in the gaseous phase of liquid nitrogen.

- Biosigma CryoGen[®] tubes are certified free from human DNA, DNases, RNases, Endotoxins, PCR inhibitors, Sterile SAL 10⁻⁶ and IATA PI 650 and do not contain traces of metals
 - They have a unique and consecutive barcode in 1D format printed on the tubes' bodies
 - The line also includes 2D CryoGen[®] tubes, which have a 2D matrix code on the bottom of the tubes, in addition to the 1D linear barcode
 - CryoGen[®] tubes can be stored in Biosigma CryoGen[®] boxes of 25, 81 or 100 places, with a 1D linear barcode printed on the side of the box, or in 2D CryoGen[®] boxes, which also have a 2D matrix code on the bottom of the boxes
 - The cryogenic boxes are made of polycarbonate to withstand the temperatures of the gaseous phase in liquid nitrogen. They are autoclavable at 121°C for 20 minutes
 - The raw material used is medical grade and certified according to USP class VI, in compliance with the United States Pharmacopoeia and with ISO 10993
-
- CryoGen[®] 1D test tubes with linear barcode
 - CryoGen[®] Box
 - CryoGen[®] 2D barcoded test tubes
 - CryoGen[®] box 2D
 - SBS 48-place rack for 2 and 5 ml CryoGen[®] Tubes
 - CryoGen[®] line accessories

WARNING

Do not dip Cryogen test tubes in the liquid phase of nitrogen. Immersion in the liquid phase may cause liquid nitrogen to become trapped inside the tube, which could lead to an increase in pressure, causing a possible explosion with risk of biological contamination. Make sure samples in the gas phase are stored above the liquid nitrogen. In this state the temperature is below the level required to maintain the material in good condition.

1.1_ SAMPLE STORAGE

CryoGen® 1D test tubes with linear barcode

- Certified free from human DNA, DNases, RNases, Endotoxin, ATP and PCR inhibitors*
- Sterile SAL 10⁻⁶**
- Compliant with IATA regulation PI 650
- Working temperatures: from generic refrigeration (+4°C) up to the gaseous phase of liquid nitrogen
- Medical grade materials
- Test tube body in polypropylene, bi-injected caps in polyethylene and TPE
- No traces of metals found within the detection limits

CLEARLine®

* Certificate of Analysis downloadable from our website www.biosigma.com
 ** Validated beta-ray treatment certificate, downloadable from our website

Coloured inserts available for colour code adaptable to both internal and external caps for quick identification of the sample

Made of medical grade polyethylene (PE) and elastomer thermoplastic (TPE) to provide a hermetic seal

Test tube body manufactured from medical grade PP

Code 128 barcode on each tube body with double decoding readable in both directions

Star shaped top cavity is engineered for use with automatic decapping equipment

Excellent chemical resistance of the cap

Thin profile external cap to ensure better insertion into standard racks and storage boxes

Test tubes and caps are autoclavable at 121°C for 20 minutes

Printed graduations

Large writing area

Excellent chemical resistance

With or without base

Test tube with self-locking base in workstations

Our bi-injected screw caps make it possible to eliminate sample leakage and contamination. Both the inner and outer screw caps are co-moulded with PE and a thermoplastic elastomer (TPE) to provide a perfect seal. This bi-injection moulding process eliminates the risk of contamination associated with the insertion of separate o-rings.

For further information, please refer to the technical data sheet downloadable from our website www.biosigma.com

500-piece dispenser box (10 50-piece zip-bags)

50-piece zip-bags with indication of sterilisation

For automatic capper/decapper
Star shaped top cavity is engineered for use with automatic decapping equipment.

No risk of contamination
Our bi-injected screw caps make it possible to eliminate sample leakage and contamination. Both the inner and outer screw caps are co-moulded with PE and a thermoplastic elastomer (TPE) to provide a perfect seal. This bi-injection moulding process eliminates the risk of contamination associated with the insertion of separate o-rings.

Insert for color coding
Color coded inserts are available to fit both internal and external caps for quick sample identification.

i All CLEARLine® cryogenic tubes with standard barcode on this page are available with coloured caps.

Add the following suffixes to the references when ordering:

Colour	Light Blue	White	Yellow	Red	Purple	Green
Suffix	/AZ	/BI	/G	/R	/VI	/V
For example	CL1ARBEPSTS/AZ	CL1ARBEPSTS/BI	CL1ARBEPSTS/G	CL1ARBEPSTS/R	CL1ARBEPSTS/VI	CL1ARBEPSTS/V

1.1_ SAMPLE STORAGE

CryoGen® Box

Features

- Suitable for storing CryoGen® 1D test tubes
- Grids available in 4 colours
- Lid positioning, guided by 45° inclined corners
- Frosted writing area on the lid and base, for easy writing
- Working temperatures: from general refrigeration (+4°C) to the gaseous phase of liquid nitrogen
- Autoclavable at +121°C for 20 minutes

Rack 1D additional features

- Laser-engraved barcode "code 128" on the side of the box
- Numeric grid on the lid and bottom

Printed numerical grid on the lid

Frosted writing area

Vial picker included in each sales unit

1D barcode lasered on rack's side

Numerical grid on the bottom and on the lid

CryoGen® Box 81 LOW standard and 1D barcoded for 1 - 2 ml tubes, external and internal cap

1.1 SAMPLE STORAGE

CryoGen® 2D barcoded test tubes

Coloured inserts available for colour code adaptable to both internal and external caps for quick identification of the sample

Star shaped top cavity is engineered for use with automatic decapping equipment

Bi-injected internal and external screw caps manufactured from medical grade polyethylene (PE) and thermoplastic elastomer (TPE) to provide a hermetic seal

Excellent chemical resistance of the cap

Thin profile external cap to ensure better insertion into standard racks and storage boxes

Printed graduations

Excellent chemical resistance of the test tube

Large writing area

Code 128 barcode on each test tube with double decoding readable in both directions and corresponding to the 2D code on the bottom

Test tube body manufactured from medical grade PP

Datamatrix code inserted in the bottom, sequential and corresponding to the "code 128" barcode on the test tube body.

The base of the tube is provided with channels to expel cryogenic liquid that could be trapped between the base of the tube and the 2D pad.

Permanent laser marking system, subjected to rigorous quality controls.

Test tube with self-locking base in workstations.

The insert bearing the 2D code is fixed in position by using ultrasound (patented system).

- Certified free from human DNA, DNases, RNases, Endotoxin, ATP and PCR inhibitors*
- Sterile SAL 10⁻⁶**
- Compliant with IATA regulation PI 650
- Working temperatures: from generic refrigeration (+4°C) to the gaseous phase of liquid nitrogen

- No traces of metals found within the detection limits
- Made of medical grade materials
- Test tube body in polypropylene, bi-injected caps in polyethylene and TPE
- Autoclavable at +121°C for 20 minutes

MICRO TEST TUBES FOR CENTRIFUGE

We offer a wide range of centrifuge test tubes with screw or snap caps, made of high transparency and medical grade raw materials.

They are suitable for various research applications, including molecular and cellular biology, biochemistry, microbiology, physiology, and more. The test tubes are designed to withstand extreme temperatures and high centrifugal forces, ensuring reliable performance and safety during use. We have different capacities and formats to meet the specific needs of our customers.

The best protection for your samples!

Operators are constantly looking for consumables that meet their needs and allow them to obtain the best results in research laboratories.

Biosigma offers the right solution with a complete line of high quality, tested and certified products.

- 0.5, 1.5 and 2.0 ml standard microtubes
- 0.5, 1.5 and 2.0 ml CLEARLine® microtubes
- 0.5, 1.5, 2.0, 5.0 ml CLEARLock® Microtubes in PP with safety closure
- 0.5, 1.5, 2.0 ml CLEARLine® Low Binding CLEARLock® Microtubes
- CLEARLine® microtubes with screw cap
- Cap Disk
- CLEARLine® Low Binding microtubes with screw cap
- CLEARLine® microtubes without cap
- CLEARLine® Screw caps for microtubes
- 4-Way Rack
- Racks for 80 Microtubes
- MyFuge™ 5 microcentrifuge
- Rack for 100 Microtubes
- Acrylic rack for 5 ml microtubes

1.1 SAMPLE STORAGE

0.5, 1.5 and 2.0 ml standard microtubes

- Flat cap for easy writing
- Clear graduation
- Excellent cap sealing
- Can be centrifuged up to 25,000 x g
- Autoclavable open at 121°C (for 20 minutes)
- Transparent polypropylene
- Non-sterile

1.1_ SAMPLE STORAGE

Low binding CLEARLock®

Minimise sample loss!

CLEARLine® Low Binding CLEARLock® Microtubes

Avoiding possible sample losses is crucial for the success of experiments, especially when volumes are small, concentrations are low or in any application where the protocols require numerous steps.

With the aim of preventing non-specific interactions between the sample and the microtubes, Biosigma has created the new CLEARLine® Low Binding CLEARLock® line.

The new microtubes are designed to minimise interactions with proteins and nucleic acids without the use of surface coatings or additives. They allow almost total sample recovery even after several manipulations.

Low Binding microtubes for Proteins and DNA are the ideal solution for both preparation and long-term preservation of samples and help researchers obtain reproducible and reliable results.

Low Binding microtubes for centrifuge

0.5 • 1.5 • 2.0 ml Low Binding CLEARLock® Microtubes with safety closure

Main Features:

- High recovery of Proteins and Nucleic Acids
- The cap prevents any involuntary opening during use
- The safety closure prevents evaporation during long-term storage and heating of samples
- Writable and pierceable cap
- Graduated, with writing area
- Excellent transparency
- Temperature range from -80°C to +100°C
- Autoclavable at +121°C for 20 minutes
- Bags with opening and closing system
- Particularly suitable for molecular biology and biochemistry
- In medical polypropylene, Non-Cytotoxic – Non-Haemolytic
- Suitable for the storage of chemical and biological samples
- Certified batches* free from human DNA, DNases, RNases, Endotoxins, ATP, and PCR inhibitors
- No traces of metals found within the detection limits

1.1 SAMPLE STORAGE

CLEARLine® microtubes with screw cap

CLEARLine®

CLEARLine® screw cap microtubes, produced by Biosigma, are the ideal solution for both the preparation and long-term preservation of samples. The combination of the polyethylene cap and the polypropylene test tube, facilitates screwing and prevents adhesion caused by using the same material for both components. The screw closure ensures maximum reliability, making them particularly suitable for use with radioactive materials, infectious agents or expensive reagents. These microtubes are available in 6 versions with conical or self-standing bottom (0.5 - 1.5 and 2 ml) and offer the choice between 3 types of caps, available in different colours to facilitate sample identification and further customise the user's needs.

CLEARLine® screw cap centrifuge microtubes are certified free from DNases, RNases and Endotoxins by our internal laboratory.

You can download the specific certificate for the batch from the certificates section on our website.

- They resist high centrifugation speeds up to 25,000 x g and temperatures ranging from -85°C to +121°C
- Autoclavable open at 121°C for 20 minutes
- ext. Ø 10.2 mm ± 0.23; int. Ø 8.5 mm ± 0.21
- Test tube in medical grade polypropylene, cap in medical grade polyethylene, O-ring in medical grade thermoplastic rubber; materials tested in accordance with European Pharmacopoeia, ISO 10993, U.S. Pharmacopeia (USP) Class VI and with Drug Master File (DMF) filed with the FDA
- Beta-ray sterilised with validated method that guarantees a Sterility Assurance Level (SAL) of 10⁻⁶
- No traces of metals found within the detection limits

- High protein recovery
- Sterile
- Temperature range from -85°C to +121°C
- Autoclavable at +121°C for 20 minutes
- Suitable for all Biochemistry applications
- Free from human and bacterial DNA, DNases, RNases, Endotoxins and PCR inhibitors
- No traces of metals found within the detection limits

1.1. SAMPLE STORAGE

4-Way Rack

Polypropylene rack, autoclavable at 121°C, arranged on 4 tiers:

- Base tier: 12 holes for 0.2 ml microtubes
- Second tier: 14 holes for 0.5 ml microtubes
- Third tier: 12 holes for 1.5 and 2 ml microtubes
- Top tier: the last row is composed of 5 attachment holes that can be used as a workstation for microtubes of any volume. They can be screwed/unscrewed with just one hand, thanks to the special internal shape of the housing

Rack for 100 Microtubes

Polypropylene rack for 100 1.5 and 2 ml microtubes.

- Supplied flat (to be assembled)
- Stackable
- Marking surface on both lengths
- Autoclavable
- Alphanumeric localisation on the tray
- Available colours: white, blue, yellow, red
- Dimensions: 110 x 263 x 45 mm

Racks for 80 Microtubes

Rack

Rigid rack for 80 1.5 ml or 2 ml microtubes. Dimensions L x D x H: 272 x 65 x 27 mm.

- Alphanumeric references
- Handles on the sides
- For use at temperatures ranging from -90°C to 121°C (autoclavable)

Acrylic rack for 5 ml microtubes

- In transparent acrylic
- For 20 x 5 ml test tubes
- Two-tier rack holder

Code	Description	Sales units
141397	Acrylic rack for 20 x 5 ml microtubes	1

MyFuge™ 5 microcentrifuge

The myFuge™ 5 microcentrifuge includes a four-position rotor compatible with a variety of 5 ml test tubes, including 5 ml snap-cap centrifuge test tubes. Additionally, this combo rotor has four additional slots for centrifugation of standard microtubes (1.5/2.0 ml). Simply close the lid and the centrifuge will quickly accelerate to a fixed speed of 5,500 rpm. Open the lid and the rotor will decelerate to a stop for removing the samples.

- For rapid centrifuging of 5 ml and 1.5 / 2 ml tubes
- Includes adapters for 12 x 75 mm tubes
- Starts and stops by closing / opening the lid
- Capacity: 4 x 5 ml and 4 x 1.5 / 2 ml

062586

1.2_ INSTRUMENTATION ITEMS

Biosigma manufactures optical cuvettes compatible with various clinical chemistry analysers such as:

- Cobas-Mira® type cuvettes
- Hitachi® type cuvettes
- 12-cell cuvette
- Express® type cuvettes
- Cuvettes and cups for instrumentation
- Semi-micro and Macro cuvettes
- Reducers for test tubes

Our products are made with high quality and transparent raw materials. We test our cuvettes with the relevant chemistry analysers in our internal laboratory during production.

Semi-micro and Macro cuvettes

Single-use spectrophotometer cuvettes

Single-use plastic cuvettes that replace fragile glass or quartz cuvettes in many applications.

Designed for single use, they eliminate time-consuming washing and the risk of cross-contamination associated with reusing cuvettes.

- In crystal polystyrene or methacrylate
- Optimal results on transmittance and absorbance tests compared to the most well-known brands on the market
- Optical path: 10 mm
- Maximum variability between the two walls of the same cuvette: <1%
- An arrow helps the correct insertion into the spectrophotometer housing
- Can be used on most commercial spectrophotometers

1.3 LIQUID DISPENSING

High quality products for handling liquids in the laboratory. Whether you need pipettes, tips, dispensers or accessories, our products are specifically designed to ensure precision, accuracy and reliability for your experiments.

- **Micropipettes**
- **Tips**
- **CLEARLine® serological pipettes**
- **Pipette dispensers**
- **Pasteur Pipettes • Reservoirs**

Automatic and manual pipette dispenser

Features of the BS400200 automatic pipette dispenser

- Can be used with most 0.1 - 100ml plastic and glass pipettes
- Six speeds for aspiration and dispensing
- Large LCD display showing low battery warning and speed settings
- One-handed activation with minimal effort
- Lightweight and ergonomic design for easy use
- High capacity lithium-ion battery for longer operating time
- Low battery indicator
- Powerful motor allows filling a 25 ml pipette in less than 5 seconds
- Replaceable 0.45 µm water repellent filter
- Battery rechargeable during use

Technical specifications of the BS400200 automatic pipette dispenser

Aspiration speed	25 ml < 5s (6 speeds)
Dispensing speed	Motor (6 speeds) + gravity
Battery	Lithium
Battery life	8 hours of intermittent use
Charging time	Approximately 2-3 hours
Type of Pipettes to use	Plastic or glass pipettes (0.1 - 100 ml), Pasteur pipettes
Filter	0.45µm water repellent
Weight	200g

Features of the 86100 manual pipette controller

- Convenient and easy to use
- Precise pipetting control
- Sturdy and lightweight
- Easy and quick maintenance
- Suitable for all types of pipettes, plastic or glass, from 0.1 to 100 ml
- 3 µm replacement filter
- Available in 2 colours

Features of the ABS028 rubber bulb

- Universal rubber bulb, equipped with three spherical valves adaptable to any glass or plastic pipette, for aspiration and subsequent dispensing of liquids
- The special rubber connection (adapter) supplied allows it to be used even with pipettes with a capacity greater than 20 ml
- By detaching this connection, it can also be adapted to pipettes with a capacity below 20 ml

Code	Description	Sales units
BS400200	Levo Plus Pipetting pipette controller	1
BS400201	0.45 µm replacement filter for Levo Plus Pipetting	1
BS400206	Replacement silicone adapter for Levo Plus Pipetting	1
861001	Red manual pipette controller	1

Serological pipettes

- In crystal polystyrene
- Available volumes: 1, 2, 5, 10, 25, 50 and 100* ml
- With reverse and negative graduation
- Batch and expiry date printed on individual peel packs
- Beta-sterilised in single or multipack (SAL 10⁻⁶)
- Multi-packaging in 25-piece zip-bag or single in easy-to-open paper/plastic peel pack
- Colour coded by volume for quick identification
- Free from human DNA, DNases, RNases, Endotoxins

1.3 LIQUID DISPENSING

Micropipette rack

- Suitable for all HPpette Plus pipette models
- 5 places
- Stand type

- Carousel holder with smooth and comfortable rotation
- Holds up to 6 HPpette Plus

Code	Description	Sales units
861006	HPpette Plus micropipette rack	1

Code	Description	Sales units
861055	Carousel pipette holder	1

25, 50 and 100 ml reservoirs

- White medical grade polystyrene
- Sterile version in single or 5-piece pack
- Non-sterile version in 100-piece pack
- Certified free from RNases, DNases, human DNA, Endotoxins
- Sterile SAL 10⁻⁶
- 4-corner pour spouts
- Graduated on the two internal walls (precision +/-5 %)
- V-shaped bottom for maximum sample recovery

Standard in white polystyrene

Ripettes and dispenser Tips 3D

Pipette dispenser

Dispenser pipette for up to 48 doses from 1 µl to 5 ml.

- Practical, convenient, lightweight (100 g)
- Easily adjustable volumes and distribution doses
- Maintenance-free

Code	Description	Sales units
070539	Ripette dispenser pipette	1

Dispenser Tips

The Dispenser Tips 3D are used for the repetitive distribution of volumes between 10 µl and 5 ml and adapt perfectly to the Eppendorf Multipipette 4780. They are available in six volumes: 0.5, 1.25, 2.5, 5, 12.5, 25 and 50 ml non-sterile. The Dispenser Tips 3D are made of polypropylene and graduated.

STANDARD TIPS

1.3_LIQUID DISPENSING

Sterile tips with filter in Biosigma CLEARLine® rack

Universal tips with filter in low retention rack, in sterile polypropylene.

Features

- New CLEARLine® packaging
- QR code on the label to simplify tracking the batch number and expiry date
- Tips with filter in natural polypropylene
- Sterile
- Autoclavable at 121°C
- Standard and Low retention
- Free from DNase, RNase, Human DNA, PCR inhibitors, Endotoxins
- Free from bacterial DNA only for the Low retention version
- In rack with hinged lid
- Compatible with most micropipettes on the market
- Eco-friendly packaging

1.3_LIQUID DISPENSING

Pasteur pipettes

Single-use transfer pipettes, suitable for handling most liquids in the laboratory.

The integrated bulb contributes to greater user safety. Our pipettes meet the requirements of routine work and of more specific work.

- In polyethylene
- Sterile or non-sterile
- In 500-pieces dispenser-box (non-sterile) or 250-pieces bags

500-pieces dispenser box for 1 and 3 ml pipettes, non-sterile

1.4_ CELL CULTURE

CELL CULTURE

Discover our range of cell culture products, designed to support your research in different fields.

By ensuring an optimal environment, they promote cell attachment and facilitate accurate sample analysis. We offer effective solutions to ensure the sterility and quality of the reagents and culture media.

Choose excellence and reliability for your cell cultures.

CLEARLine® treated cell culture flasks

CLEARLine® cell culture flasks ergonomically designed for easy handling, minimising the risk of contamination. Intuitive design and rigorous testing on each batch, they offer safety and efficiency.

- With filter or standard cap
- Available sizes: 25, 75, 175 and 225 cm²
- Materials:
 - Flask: PS
 - Cap: HDPE
 - Filter (if applicable): PTFE; pore size 0.2 µm
- DNase and RNase free
- Non-pyrogenic, non-cytotoxic
- Sterile

Code	Cap	Growth area (cm ²)	Total volume (ml)	Units/Bags	Sales units
CL200	Filtering	25	60	10	200
CL201	Filtering	75	250	5	100
CL202	Filtering	175	650	5	40
CL203	Filtering	225	850	5	25
CL204	Standard	25	60	10	200
CL205	Standard	75	250	5	100
CL206	Standard	175	650	5	40
CL207	Standard	225	850	5	25

CLEARLine® treated multiwell plates for cell culture

CLEARLine® multiwell plates designed to ensure optimal cell growth and reproducible results. Each batch is rigorously tested with cell lines to ensure consistency and reliability.

- Available sizes: 6, 12, 24, 48 and 96 wells with flat bottom
- Materials:
 - Plate: PS
 - Lid: PS
- DNase and RNase free
- Non-pyrogenic, non-cytotoxic
- Sterile

Code	Wells	Growth area (cm ²)	Units/Bags	Sales units
CL300	6	9.6	Sealed pouch	50
CL301	12	3.87	Sealed pouch	50
CL302	24	3.87	Sealed pouch	50
CL303	96	0.32	Sealed pouch	50
CL304	48	0.87	Sealed pouch	50

CLEARLine® treated plates for cell culture

CLEARLine® plates designed to ensure optimal cell growth, with an ergonomic toothed rim design that reduces the risk of contamination. Ideal for a wide range of laboratory applications, including inoculation, marking, weighing, separation and processing of tissues or cells.

- Available sizes: Ø 35, 60, 100 and 150 mm
- Materials:
 - Plate: PS
 - DNase and RNase free
 - Non-pyrogenic, non-cytotoxic
 - Sterile

Code	Description	Units/Bags	Sales units
CL900	Treated plates for cell culture Ø 60 mm	10	500
CL901	Treated plates for cell culture Ø 100 mm	10	300
CL902	Treated plates for cell culture Ø 150 mm	5	100
CL903	Treated plates for cell culture Ø 35 mm	5	100

CLEARLine® vacuum filtration units

CLEARLine® single-use vacuum filter systems are complete filtration solutions, supplied with filter funnel, adapter and collection tank. They are designed to simplify and optimise the filtration process, allowing rapid and efficient removal of unwanted particles from liquids and solutions.

- Available sizes: 250, 500 and 1000 ml
- Materials:
 - Funnel: PS
 - Collection tank: PS
 - Filtering membrane: PES with 0.22µm pores
- Non-pyrogenic, non-cytotoxic
- Sterile

Code	Volume (ml)	Membrane material	Membrane size (µm)	Units/Bags	Sales units
CL500	250	PES	0.22	1	12
CL501	500	PES	0.22	1	12
CL502	1000	PES	0.22	1	12

Scrapers for cell culture

Scrapers for cell culture are essential tools for collecting and transferring adherent cells in the laboratory. Equipped with a flexible blade and an ergonomic handle available in two different lengths, they allow cells to be gently detached from culture surfaces without damaging them. Each scraper is individually packaged to ensure sterility and prevent contamination, thus ensuring maximum safety and reliability during use.

- Materials: Polyethylene
- Non-Pyrogenic
- Sterile

Code	Handle length (cm)	Blade length (mm)	Type	Units/Bags	Sales units
010153	18	18	Adjustable blade	1	100

1.5_ TEST TUBES, CAPS AND ACCESSORIES

Biosigma has been providing the best laboratory products, such as test tubes, caps and supports, since 1988.

- Sterile test tubes
- 10 ml cylindrical test tubes
- Non-sterile test tubes
- Test tubes with double snap cap
- Caps
- Rack
- Sterile centrifuge test tubes
- Drosophila
- Self-adhesive label

Our single-use plastic tubes are available in various sizes and shapes to meet your needs. Caps and stoppers are designed to ensure an airtight seal for your test tubes.

Racks are versatile and can house different diameters and volumes of tubes.

Test tubes

CLEARLine® sterile screw cap centrifuge test tubes

- Graduated
- With writing area
- Sterile
- Polypropylene test tube and polyethylene screw cap
- Free from human DNA, DNases, RNases, Endotoxins
- Non-cytotoxic
- In rack or bag
- Indication of maximum volume for low temperature storage

Code	Volume (ml)	Shape	Dimensions (mm)	Centrifugation speed	Units/Bags	Sales units

1.6_ URINALYSIS

FAST READ 102® is a slide for standardising microscopic urinalysis.

It allows easy identification of the sample using the numbers printed on the sides.

- **Fast-Read 102® single-use slide for cell counting**
- **KOVA Liqua-Trol®**
- **Fast-Read® Kit**
- **Stain for microscopy**
- **Test tubes**

Fast-Read 102® single-use slide for cell counting

The FAST-READ 102® system improves the standardisation of urine microscopic examination, ensuring precise and reproducible data. This ensures constant readings at all times and independent of technical variations between different operators.

FAST-READ 102® consists of a slide of optically transparent material, with 10 separate chambers containing a standard volume of 7 µL. The urine sediment sample, deposited at the mouth of the observation chamber, is distributed uniformly by capillary action inside the chamber itself. Each chamber has an own system for collecting excess urine to prevent the possibility of contamination.

The FAST-READ 102® slide also allows easy classification of samples using the specific numbering shown on the sides.

Fast-Read 102®

Code	Description	Sales units
BVS100	Single-use slide for cell counting	100

Centrifuge the urine sample, dispense a drop of STAIN dye, then insert a pipette into the test tube.

Use the pipette to mix the urine sediment by pressing the bulb several times and then deposit a drop of sample in the appropriate area of the slide.

HOW TO USE THE NUMBERING Example: to identify samples from no. 131 to no. 140, colour no. 1 on the left side and no. 3 on the right side of the slide.

M-T system

When analysing urine sediment, it is very important that operators always use the same method for sample preparation in order to ensure the repeatability of the tests. Furthermore, with the traditional system of reading the urine sediment currently in use in many laboratories, the compaction of the sediment creates an overlap of epithelial cells. This makes it difficult to check the presence and quantity of other cellular elements. With the M-T System, these inconveniences can be overcome by standardising, with a few steps, the preparation of the sample to be analysed.

1. Fill the BSP074 test tubes with 10 ml of urine, and centrifuge
2. Insert the M-T Microtips® BSV143 triple-bulb pipettes, making sure they are secured in the test tube
3. Tilt the rack to drain excess urine
4. You obtain 1 ml of sediment which, re-suspended, is ready to be analysed on the Fast Read 102® slides
5. Deposit the sediment at the mouth of the slide observation chamber using the M-T microtips pipette

M-T system

1.6_ URINALYSIS

How to count cells

After filling the counting chamber with the sample, count the cells distributed in N squares. Considering that the grid consists of 10 squares, that each square has a size of 1 x 1 mm, a depth of 0.1 mm and a volume of 0.1µl, the formula for determining the cell concentration (cells/ml) is:

$$[\text{Cells/ml}] = \left(\frac{\sum \text{cells counted in N squares}}{N} \right) \times \text{dilution factor} \times 10^4$$

10^4 = conversion from 0.1µl to 1ml

Be careful with cells on the edges, only those on two sides should be counted, to avoid the risk of overestimating or underestimating.

In the example above, we perform the cell count on a 10-fold concentrated sample:

N = 5 (number of squares considered for counting)

\sum cells counted in the 5 squares = 67

Dilution factor = 10^{-1}

$$[\text{Cells/ml}] = (67 / 5) \times 10^{-1} \times 10^4 = 13.4 \times 10^3$$

A: GRID	
Dimensions	2 mm x 5 mm
Depth	0.1 mm
Volume	1 µl
Each grid includes	10 squares
Cell volume	7 µl
B: SQUARE	
Dimensions	1 mm x 1 mm
Depth	0.1 mm
Volume	0.1 µl
Each square includes	16 sectors
C: SECTOR	
Dimensions	0.25 mm x 0.25 mm
Depth	0.1 mm
Sector volume	0.00625 µl

KOVA Liqua-Trol®

KOVA Liqua-Trol® is a ready-to-use liquid product, designed to be used in clinical laboratories as a control for qualitative and semi-quantitative routine urinalysis procedures.

- Reduces times and eliminates reconstitution errors
- Available in two levels, normal and abnormal.
- With or without microscopics.

Kova Kit

A selection of products for your microbiology laboratory:

- Disposable loops
- CLEARStable preservation of microbial cultures sytem
- Swabs
- Plates
- Sterile cell spreaders
- pH paper
- Timer
- Foam swabs with liquid collection-trasnport medium

You can use these products to culture bacteria, fungi or other microorganisms. All items are tested with rigorous quality controls to ensure perfect results.

Disposable loops

Biosigma loops are made of polypropylene, equipped at one end with a ring and at the other with an inoculation needle, sterilised with ethylene oxide and available in peel packs of 1, 5, 10, 20 pieces.

- In polypropylene
- 1 or 10 µl
- Peel pack
- In single pack or 5, 10, 20-piece bag
- Sterile
- Batch number and expiry date on each bag and peel pack

1.7_ MICROBIOLOGY

CLEARStable

Reliable and stable microbial preservation system

“Simplify your workflow with CLEARStable’s larger beads and efficient design”

CLEARStable is an innovative system for the freezing and long-term preservation of bacterial and microbial cultures. The system is designed to eliminate the need for freeze-drying or frequent transfers, ensuring optimal preservation of the cultures. The system includes a cryobox containing 80 sterile vial and 1 vial picker. Each vial includes 20 ±1 porous beads, immersed in 1 ±0.1 ml of a glycerol-based cryoprotective solution. Sterile

CLEARStable ensures optimal preservation of bacteria, bacterial spores, and fungi at low temperatures, maintaining their viability and genetic stability. It is ideal for microbiology laboratories, research, and biotechnology production.

Optimize the stability and preservation of your microorganisms with CLEARStable!

1D Version

2D Version

- **Long-Term Preservation:** Ensures viability and stability of microorganisms for extended periods
- **Multiple Freezing Options:** Store microorganisms at -20°C, -80°C, or in nitrogen vapour
- **Larger Beads for Better Handling:** Easier manipulation, improving efficiency
- **Simplified Identification:** Caps and beads in various colors for easy sample identification
- **Flexible Options:** Available with or without cryoprotectant, and with 1D or 2D barcoding

New bigger beads

CLEARStable's larger beads make handling easier, allowing for quicker freezing and thawing of your samples.

CLEARStable offers a reliable, innovative solution for the stable freezing and long-term preservation of microorganisms at multiple temperature settings. Each vial contains large porous beads, with or without cryoprotectant. Choice of 1D or 2D barcodes for quick sample identification and traceability on boxes and vials.

Advantage

- Extended and stable Preservation
- Multiple Freezing Temperatures
- Easy Handling
- Color-Coded identification
- Customizable Options

Larger Beads for Easier Handling

1.7_ MICROBIOLOGY

Swabs

Swab with transport medium

Sterile swabs with polyethylene cap inserted in a polypropylene test tube Ø 12x150 mm complete with transport medium. Plastic or aluminium shafts. The swab is available dry or with various transport media: Stuart, Amies, Amies with charcoal.

Stuart: for general use, suitable for pharyngeal and vaginal samples.

Amies: for general use, suitable for taking samples from the eye, nose, ear, throat, skin, genital system.

Amies with charcoal: The addition of vegetable charcoal to the Amies medium improves the survival of Neisseria gonorrhoea and of intestinal pathogenic bacteria by neutralising toxic metabolites.

- Sterile
- Plastic or aluminium shaft sold separately
- Individually wrapped
- Cotton or viscose tip
- With transport medium
- Test tubes in polypropylene

Code	Medium	Shaft material	Tip	Cap Colour	Sales units
BSM001	Stuart	Plastic	Viscose	Red	900
BSM001/M		Aluminium	Cotton	Orange	900
BSM003	Amies	Plastic	Viscose	Blue	900

Sealing tapes for Petri dishes

Adhesive tape for sealing and closing Petri dishes and microplates.

- They limit the risk of evaporation
- They reduce gas exchanges and therefore the risk of contamination
- Width: 12.7 mm
- Length: 35 m
- Good resistance to solvents, impermeable to liquids
- Use temperature -30°C / +70°C

Colours	Transparent	White	Red	Yellow	Blue	Sales units
Code	053001	053002	053003	053004	053005	1

Dispenser rack for Petri dishes

Epoxy coated steel rack for storing and distributing Petri dishes.

- 2 Models; Single rack or stand composed of three racks
- Contains 11 or 3 X 11 Petri dishes in polystyrene with a diameter of Ø 90 mm or Ø 100 mm in polystyrene
- Top loading
- The dish can be retrieved from the bottom

Code	Model	L x d x h (mm)	Capacity	Sales units
085495	1 Rack	145 x 110 x 280	11	1
085496	1 stand + 3 Racks	145 x 320 x 280	3 X 11	1

1.7_ MICROBIOLOGY

Sterile cell spreaders

Cell spreaders for microbiology are instruments specifically designed for handling microbiological samples during plating procedures. They are available in different ergonomic shapes specifically designed to adapt to the type of plate used and to ensure optimal comfort.

“L” shaped Cell spreaders

- Single-use sticks
- “L” shape with curved end
- In polystyrene
- Smooth surface
- Individually wrapped or bags of 10
- Sterile

Code	Description	Dimensions (mm)	Units/Bags	Sales units
BSM0230	“L” shaped Cell spreader in sterile ABS	149.6 x 39.8	10	200
BSM0231	“L” shaped Cell spreader in sterile ABS	149.6 x 39.8	1	500
BSM0235	“L” shaped Cell spreader in sterile ABS	149.6 x 39.8	5	500

“T” shaped sticks

- Easy handling
- “T” shape
- Sterile

Foam swabs with liquid collection-transport medium

AMIES liquid transport medium

Swabs with pink screw cap test tube containing 1 ml of AMIES liquid medium for the collection and preservation of aerobic, anaerobic and other sensitive bacteria such as *Streptococcus pyogenes*, *Neisseria gonorrhoeae*, *Bacteroides fragilis*, *Haemophilus influenzae*, *Streptococcus pneumoniae*, etc. up to 48 hours at room temperature or refrigerated. They can also be used for the collection and preservation of mycobacteria and fungi.

Code	Description	Units/Bags	Sales units
BSM080	Standard Tip	100 pcs	900 pcs (9x100)
BSM081	Fine Tip	100 pcs	900 pcs (9x100)

STUART liquid medium

Swabs with blue screw cap test tube containing 1 ml of STUART type liquid medium for the collection and preservation of *Neisseria gonorrhoeae*, *Trichomonas vaginalis*, *Haemophilus influenzae*, *Bacteroides fragilis*, *Pseudomonas aeruginosa*, *Streptococcus pneumoniae*, *Streptococcus pyogenes*, *Corynebacterium diphtheria*, enteric bacteria and upper respiratory tract bacteria.

Code	Description	Units/Bags	Sales units
BSM082	Standard Tip	100 pcs	900 pcs (9x100)
BSM083	Fine Tip	100 pcs	900 pcs (9x100)

CARY BLAIR liquid transport medium

Swabs with green screw cap test tube containing 2 ml of CARY BLAIR type liquid medium for the collection of clinical stool samples or rectal swabs and the preservation of enteropathogenic agents such as *Salmonella*, *Vibrio*, *Escherichia coli*, *Shigella flexneri*, *S. typhimurium*, *E. faecalis* (VRE), *V. parahaemolyticus*, *Y. enterocolitica*, *C. jejuni*, *C. difficile*, *Campylobacter*.

Code	Description	Units/Bags	Sales units
BSM084	Standard Tip	100 pcs	900 pcs (9x100)
BSM085	Fine Tip	100 pcs	900 pcs (9x100)

SELENITE liquid medium

Swabs with white screw cap test tube containing 2 ml of SELENITE type liquid medium (enrichment broth) for the collection of clinical stool samples or rectal swabs and specific for the transport, survival and isolation of *Salmonella enterica* and *Shigella sonnei*, reducing the growth of other enteropathogenic agents such as *Escherichia coli* and faecal streptococci.

Code	Description	Units/Bags	Sales units
BSM086	Standard Tip	100 pcs	900 pcs (9x100)
BSM087	Fine Tip	100 pcs	900 pcs (9x100)

Saline solution

Swabs with blue screw cap test tube containing 2 ml of sterile buffered physiological saline solution, pH 7.2. Particularly useful for immediately obtaining a diluted solution of the clinical sample ready for inoculation and/or analysis.

Code	Description	Units/Bags	Sales units
BSM088	Standard Tip	100 pcs	600 pcs (6x100)
BSM089	Fine Tip	100 pcs	600 pcs (6x100)

Liquid medium for Viruses, Chlamydia, Mycoplasma and Ureaplasma

Swabs with liquid transport test tube, stable at room temperature, suitable for the collection, transport and preservation of Viruses (including H1N1 Influenza), Chlamydia, Mycoplasma and Ureaplasma. The liquid medium allows the sample to be diluted easily and quickly, obtaining a homogeneous solution ready for use and suitable for obtaining several identical aliquots of sample to carry out different analyses.

Code	Volume (ml)	Description	Units/Bags	Sales units
BSM090	1	Standard Tip	100 pcs	600 pcs (6x100)
BSM091	1	Fine Tip	100 pcs	600 pcs (6x100)
BSM092	3	Standard Tip	100 pcs	600 pcs (6x100)
BSM093	3	Fine Tip	100 pcs	600 pcs (6x100)

1.8_ GINECOLOGY AND FERTILITY

Gynecology and fertility products:

- **Waldeck Testsimplerts®**
- **Semen counts**
- **Fertility collector**
- **Cytology spray**
- **Vaginal speculum**
- **Ayre spatulas**
- **Brushes for cytological sampling**
- **Brushes for endocervical sampling**

These products are designed for safe and comfortable use.

They are manufactured following quality and reliability standards.

Waldeck Testsimplerts®

Ready-to-use pre-stained slide for testing the following parameters:

- Characterisation and differentiation of blood cellular elements
- Cytological examination of milk, urine and cerebrospinal fluid CSF
- Vaginal secretions
- Tumour cells
- Staining of urinary sediments
- Staining of spermatozoa

Semen counts

Cell-VU® slide for semen counts

- For counting spermatozoa in undiluted samples
- Laser-engraved counting grid
- The slide is composed of 2 chambers, each 20 µl deep

Code	Description	Sales units
VBS1000	Ready-to-use pre-stained slide	50

Code	Description	Sales units
BSC729	Cell-VU® slide for semen counts (pack of 25 microscope slides and 50 cover slips)	50

1.8_ GINECOLOGY AND FERTILITY

Fertility collector

Seminal fluid collection system composed of a funnel that maximises the collection of material and, thanks to its large diameter, helps the patient for the collection itself. As this funnel is placed on a graduated test tube, it avoids the risk for the operator of introducing potentially infected material into the container.

- Sterile
- With 15 ml graduated test tube in PS
- With separate label and test tube holder

Code	Description	Sales units
BSC740	Container for collecting semen	40

Cytology spray

- Kito-Fix cytology spray
- 100 ml bottle

Code	Description	Sales units
BSI109	Kito-Fix cytology spray	1

Brushes for endocervical sampling

Brush for endocervical sampling.

- Allows both endocervical and exocervical cells to be collected
- Available sterile individually wrapped
- Length 210 mm
- Synthetic bristles in hypoallergenic material

Code	Description	Sales units
BSM022	Brush for endocervical sampling	100

Vaginal speculum

The speculum has been designed with a fully anatomical profile. The central pin with locking scale allows the speculum to be locked at the desired opening.

- Sterile
- Individually wrapped
- In polystyrene
- With central pin

Code	Size	Internal packaging	Sales units
BSM240	Small	Single	200
BSM241	Medium	Single	200
BSM242	Large	Single	200

Ayre spatulas

Shaped spatulas in birch wood or polystyrene.

- Sterile
- Individually wrapped
- In polystyrene or wood
- Latex-free

Code	Material	Dim. (mm)	Sterile	Units/Bags	Sales units
BSM018	Polystyrene	180	X	Single	100
BSM016	Wood	180	X	Single	5000

Brushes for cytological sampling.

Brush for cytological sampling.

- Also available sterile individually wrapped
- Length 210 mm
- Synthetic bristles in hypoallergenic material

Code	Sterile	Units/Bags	Sales units
BSM009	X	Single	1000
BSM008			50

1.9_ CONTAINERS

Our containers for biological samples are available in both sterile and non-sterile versions. Equipped with lids, they ensure safety and prevent contamination. Ideal for collecting biological samples; used for accurate and reliable diagnostic analyses in the chemical, physical, microbiological and cytological fields.

- Urine containers
- Stool collection containers
- Sputum collection containers
- 24h urine containers
- Water sampling bottles
- Jars with screw cap and undercap
- Waste containers

These products are made with materials that comply with high safety standards.

Urine containers

Screw cap containers with writing area or label, graduated.

- In transparent polypropylene or polystyrene
- Red, white or blue screw cap
- Available individually wrapped
- Writing area or with label
- Easy-to-read graduation
- Sterile

Code	Cap Colour	Volume (ml)	Diameter (mm)	Height (mm)	Sterile	Indiv. wrapped	Label	Writing area	Material	Sales units

BSC148	Red	60	Capped	56.5	37.5	X	PS	400

1.9_ CONTAINERS

24h urine containers

24h urine collection containers with handle for easy transport.

- In polyethylene
- Graduated
- 2500 ml

Also available in amber on page 80

Code	Model	Vol. (ml)	Handle	Dimensions (mm)	Sales units
BSL483	Bottle	2500	X	Ø 130 x 250	30
BSL486	Rectangular jerrycan	2500	Ergonomic	245 x 110 x 160	30

Water sampling bottles

Dedicated to optimising the sampling of water and/or food substances, intended for microbiological analysis, the bottles are designed paying attention to safety and ergonomics.

- Bottles in virgin PET
- With or without thiosulphate
- Traceability label
- Sterile
- Screw cap with integrity indicator
- Cap equipped with gasket for correct sealing
- Graduated

Code	Volume (ml)	Dimensions (mm)	Thiosulphate	Sales units
BLP001	500	70x70x145	X	120
BLP002	500	70x70x145		120
BLP003	1000	90x90x175	X	72
BLP004	1000	90x90x175		72

Sampling accessories

- Sterile cylindrical container in PP
- Capacity: 200 ml
- Screw cap with quick opening
- Leak-proof closure
- Usable length of the handle 20 cm
- Individually wrapped

Code	Description	Sterile	Units/Bags	Sales units
BSM100	200 ml PP sampler Screw cap and handle	X	1	80

Jars with screw cap and undercap

The plastic jars are sturdy, safe and easy to handle.

Equipped with undercap and screw cap, they are easy to use in various sectors: from chemistry to animal husbandry and agriculture, to use as containers for cosmetics and pharmaceuticals and many other fields.

Thanks to the wide mouth, they are suitable for containing: creams, semi-solid substances, crystals, granules and powders.

- Material: High density polyethylene
- Colour: Neutral - for food use

1.9_ CONTAINERS

Waste containers

Designed for the safe collection and correct disposal of waste generated during laboratory activities. Made of resistant materials and compliant with safety and environmental regulations, these containers are essential for maintaining a clean and safe working environment. Available in different sizes to adapt to the specific needs of the laboratory, they are equipped with safe closures to prevent spills and contamination.

Containers for sharp items - BS line

- In PP
- Excellent stability
- Easy interlocking assembly of the two shells
- Extremely easy to use
- Temporary closure and permanent closure with seal
- No emission of harmful gases during incineration
- Indication of the filling level

Code	Volume (l)	Dimensions (cm)	Material	Sales units
BSC300	1.5	11 x 12 x 12	PP	50

Easy opening

Needle and insulin pen removal notches

Wide opening

1.10_ HISTOLOGY AND MICROSCOPY

We offer a wide range of histology products:

- Histology and biopsy cassettes
- Microscope slides
- Slide boxes
- Cyto cuvette
- Counting chambers
- Specimen pots
- Stains
- Bi-distilled water

Our products are designed to ensure quality, precision and efficiency in your laboratory.

Histology and biopsy cassettes

Histology and biopsy cassettes with detachable lid. Made of acetal resin, resistant to decalcifying solvents, histological solutions and ultrasonic techniques. Writing area on 3 sides: one on the front and two on the side. Can be used on automatic instruments.

Innovative locking system

It eliminates the inconvenience of accidentally opening the cassette during processing with consequent loss of the sample and at the same time allows easy opening of the cassette.

Photo 1: This purpose is achieved through the presence of a front locking hook facing the inside of the cassette which, in the case of bulky samples, resists accidental opening.

Photo 2: Furthermore, the presence of special ribs on the lid prevents its forward movement with respect to the body of the cassette, ensuring the insertion and sealing of the two rear hooks in the appropriate slots (**Photo 3**), thus avoiding opening the cassette at the back.

Photo 4: The opening tab has no sharp edges and is structured to allow easy opening by the operator. The front writing area has an angle of 45°. Made of polyoxymethylene (POM).

Histology Cassettes

POM cassettes with detachable lid (40 x 28 x 7 mm) with rectangular holes (5 x 1 mm)

Code	Colour	Units/Bags	Sales units
BSI102	White	500	2000
BSI1022	Yellow	500	2000

BSI1036	Green	500	2000
BSI1037	Orange	500	2000
BSI1038	Light Blue	500	2000

6 single storage drawers

- In polystyrene
- Stores and identifies more than 165 embedding rings or 250 cassettes per drawer
- Shock resistant
- Identification labels included

Code	Description	Sales units
040669	6 single storage drawers	1

Histology sponge

- Protective sponges with controlled porosity
- For embedding cassettes
- Resistant to solvents used for processing
- Useful when preparing small biopsy specimens

Code	Colour	Units/Bags	Sales units
BSI105	Blue	500	5000

Cassette without lid

Embedding cassette without lid compatible with metal lids

Code	Colour	Units/Bags	Sales units
BSI104	White	500	2000

Steel lid

Steel lid for embedding cassettes

- Made of stainless steel
- 28 x 40 mm

Code	Units/Bags	Sales units
BSI220	10	20

Stainless steel base mould

- Made of stainless steel
- For embedding
- Smooth internal surface
- Can be used with embedding cassettes or rings

Code	Description	Sales units
040728	Stainless steel base mould 7 x 7 x 5 mm	12

1.10_ HISTOLOGY AND MICROSCOPY

Microscope slides

- Ready-to-use, washed and degreased microscope slides
- Packed in 50-piece boxes
- Thickness ± 1 mm
- With or without separating paper between the slides

Cover slips

- Thickness: 0.13 ± 0.17 mm
- Clear glass

CLEARLine® microscope slides

- Ready-to-use, washed and degreased microscope slides
- Packed in 50-piece boxes
- Thickness ± 1 mm
- For inkjet printers

CLEARLine® cover slips

- Thickness from 0.16 to 0.19 mm
- Clear glass
- For automatic coverslippers

Histobond®

Histobond® microscope slides are positively charged and allow greater adhesion of the sample under examination.

Code	Description	Internal units	Sales units
VBS5001	Adhesive slide, with silane-treated surface	100	2000

Slide boxes

- Individually numbered places
- Supplied with classification card
- Biological risk label on the upper part
- In ABS
- For 26 x 76 mm slides

Code	Dimensions (mm)	Places	Sales units
BSL274	3.0 x 5.0 x 8.0	12	15
BSL276	3.0 x 9.5 x 8.0	25	15
BSL277	3.0 x 8.0 x 20.0	50	15
BSL278	3.0 x 16.0 x 20.0	100	15

2-place slide holder

- 2-place slide holder
- For 26 x 76 mm slides
- Equipped with a ring for applying seals or identification tags

Code	Places	Sales units
BSI101	2	1000

Cardboard slide holders

- Suitable for temporary storage and transfer of slides
- Made of heavy, economical and reusable cardboard
- Suitable for standard slides (Dim. 26x76 mm; thickness 1.0±0.2 mm)
- With or without lid
- With or without dividers

Code	Description	Lid	Dividers	Sales units

Post slide holder

- Post slide holder
- In polypropylene
- Snap closure
- With 1, 2 or 3 places
- For 26 x 76 mm slides

Code	Places	Units/Bags	Sales units
BSL923	1	10	200
BSL925	2	10	100
BSL924	3	10	100

Post slide holder from 5 to 10 places

- In polypropylene
- Screw cap
- 40 x 90 mm
- With ring for sealing applications
- For 26 x 76 mm slides

Code	Dimensions (mm)	Places	Units/Bags	Sales units
BSL922	40 x 90	from 5 to 10	50	250

Slide tray in plastic

- From 10 to 40 places
- In polystyrene
- White colour
- For 26 x 76 mm slides

Code	Dimensions (mm)	Places	Sales units
BSL671	34.0 x 10.0	10	40
BSL672	34.0 x 19.0	20	20
BSL673	34.0 x 40.0	40	10

1.10_ HISTOLOGY AND MICROSCOPY

Makler chambers

Counting chambers with predetermined depth, to obtain a single level of spermatozoa

- Lid with grid with 100 measuring cells, approx. 0.1 mm
- 10 µl space between the cells and the lid

Code	Description	Sales units
BS3568	Makler chamber	1

Schifferdecker staining jar

Soda-lime glass jar with lid, Schifferdecker type

- For 10 76 x 26 mm slides (or 20 slides placed back to back)

Code	Dimension (mm)	Capacity (mm)	Sales units
068511	l x w x h: 90 x 70 x 50	For 10 76 x 26 slides (or 20 slides placed back to back)	1

Hellendahl staining jar

Jar with lid, Hellendahl type

- In PMP (TPX) or glass
- For 8 slides in vertical position or 16 slides placed back to back
- l x w x h: 58 x 5 x 86 mm

Code	Dimension (mm)	Capacity (mm)	Sales units
391059	l x w x h: 58 x 5 x 86	8 76 x 26 slides (or 16 slides placed back to back)	1
068509	l x w x h: 58.5 x 58.5 x 100	8 76 x 26 slides	1

Coplin staining jar

Soda-lime glass jar with lid, Coplin type

- For 5 76 x 26 mm slides (or 10 slides placed back to back)

Code	Description	Sales units
068512	Staining jar Glass Coplin ø x h = 73 x 105 mm	1

Burker's chamber

Dark line

The standard counting chambers have the counting grids engraved on the bottom of the chamber.

Bright line

The "bright line" counting chambers have the counting grids engraved in a thin layer of metal.

- Manufactured with a special optical glass
- Chamber depth tolerances 2% (max)
- Complies with DIN ISO 12847

Counting chambers

Code	Type of chamber	With clamps	Type of grid	Sales units
VBS700A	Burker	X	Bright line	1
900514	Fuchs-Rosenthal	X	Dark line	1
900509	Nageotte	X	Dark line	1
900511	Improved Neubauer	X	Dark line	1
900512	Thoma	X	Dark line	1

Cover slips for cell counting chambers

Code	For chambers	Dimensions (mm)	Thickness (mm)	Sales units
140537	Malassez, Neubauer, Thoma, Fuchs-Rosenthal, Lemaur, Agasse Lafont	22 x 22	0.4	10
140599	Nageotte	22 x 30	0.4	100

Cyto Cuvette

Single-use chambers for cyto centrifuge with high-absorption cardboard sheet. Available with 1, 2 or 3 wells

- In polypropylene
- Compatible with Shandon centrifuges
- With separate caps

Code	Description	Sales units
BSI1056	1-well cyto cuvette with incorporated cardboard sheet	500
BSI1058	2-well cyto cuvette with incorporated cardboard sheet	500
BSI1059	3-well cyto cuvette with incorporated cardboard sheet	500

1.10_ HISTOLOGY AND MICROSCOPY

Specimen pots

- Pots in shock-proof polystyrene
- For surgical specimens
- With snap closure
- With or without silkscreen

Code	Dimensions (mm Ø)	Volume (ml)	Silk-screen printing	Sales units
BSC2512	125 x 70	500	X	180
BSC2511	125 x 70	500		180
BSC2522	125 x 120	1000	X	180
BSC2521	125 x 120	1000		180

BSC2524	200 x 130	2500		52
BSC2527	200 x 215	5000	X	40

Immersion oil

Microscopy immersion media have approximately the same refractive index as glass. Thanks to immersion oil, the deflection of light rays is almost completely eliminated and the performance of microscope lenses is therefore considerably improved.

Code	Description	Sales units
BSI114	100 ml immersion oil	1

Eukitt embedding resin

- Rapid hardening
- Solidification in 20 minutes

Code	Description	Sales units
045798	Embedding resin - 100 ml bottle	1
045799	Embedding resin - 250 ml bottle	1

Stains

Ideal stains for Histology.

- In 250, 500 or 1000 ml bottles

Code	Description	Sales units
TBS494	Methylene Blue, 1% aqueous solution	250 ml
TBS614	Lugol's solution for colposcopy	250 ml
TBS757	Turk's reagent for leukocyte counting	1000 ml
TBS560	Giemsa stain (Methylene Blue)	500 ml
TBS625	May Grunwald	500 ml
777107	Gram stain kit	4 250 ml bottles

Bi-distilled water

Ready-to-use 'bag in box' bi-distilled water to optimise laboratory space.

- Bag in box packaging: plastic can with tap inside cardboard box

Code	Description	Sales units
TBS102	Bi-distilled water in 10 litre tank with tap	1

We offer a range of products for hematology.

Our products include various diagnostic accessories and more:

- **Securdrop**
- **DIFF-SAFE® Blood Dispenser**
- **Breaklot stick**
- **Blood grouping strips**
- **Immunology plates**
- **Box for 4 blood grouping strips**
- **Microplate sealing film**

1.11_ HEMATOLOGY

Securdrop

For piercing blood bag segment.

- Allows cells to pass easily
- Ribbed edges allow easy handling with gloves
- Fits 10 and 12 ml tube sizes
- Wide mouth fits most segments
- FDA approved
- Single-use

Code	Description	Sales units
BSA039TX	Bag segment piercing device	1000

Breaklot stick

- Shock-proof polystyrene
- Non-sterile

Code	Colour	Units/Bags	Sales units
BSA066	White	1000	3000

Immunology plates

- In polystyrene
- Available in 3 bottom types ("U", "V", "Flat")
- Sterile and non-sterile

Code	Bottom	Sterile	Sales units
BSD001	U		50
BSD002	V		50
BSD003	Flat		50
BSD010	U	X	300
BSD011	V	X	300
BSD012	Flat	X	300
BSD013	Plate cover (individually wrapped)		50
BSD013/S	Plate cover (individually wrapped and sterile)		50

DIFF-SAFE® Blood Dispenser

Eliminates the need to remove the cap from the blood test tube when performing a blood smear. DIFF-SAFE® Blood Dispenser is the answer to the growing concern about airborne pathogens in hematology laboratories.

- Compatible with Vacutainer® and Hannagard® Brand test tubes
- Reduces smear time by half

Code	Description	Sales units
BSS700	Intended for microbiological testing	1000

Blood grouping strips

For safe, easy, fast and clear blood group testing.

- Stackable for space saving
- In polystyrene

Code	Dimensions (mm)	Places	Sales units
BSA037	173 x 44.5 x 6	10	250

Box for 4 blood grouping strips

- In crystal polystyrene
- Box for 4 plates

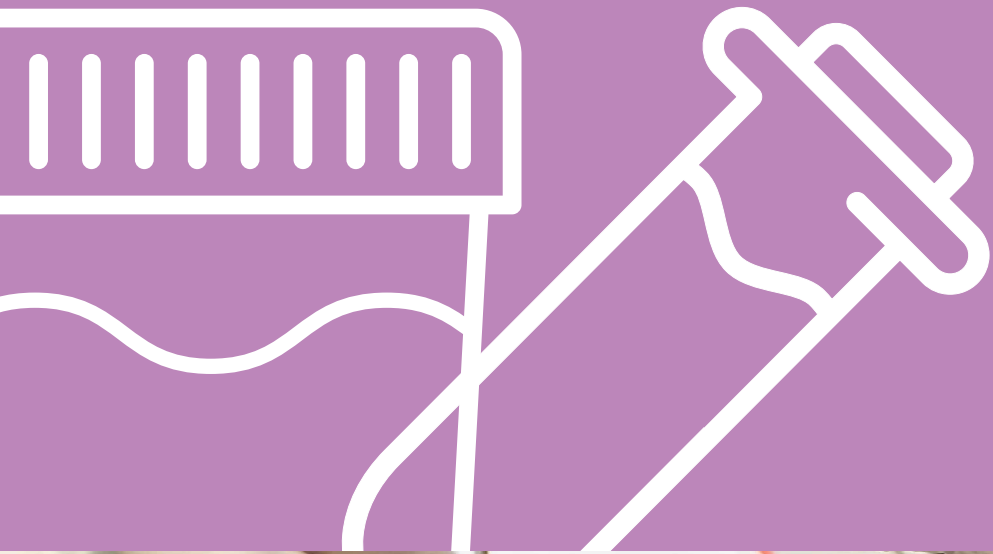

Code	Description	Sales units
BSA0361	Cassette for 4 BSA037	20

Microplate sealing film

- For closing all plate models
- Aluminium temperature resistance: -30°C and +150°C
- DNase and RNase free

Code	Dimensions (mm)	Material	Sales units
106570	131 x 81.3	Aluminium	100

2.1 URINE VACUUM SAMPLING SYSTEM

A selection from our range of vacuum sampling products.

The range includes:

- Urine vacuum containers
- Vacutainer urine tubes
- 3000 ml containers with sampling probe
- Urine vacuum sampling probes
- Vacumed® venipuncture system
- Butterfly needles
- Syringes and needles
- Sampling system
- ESR system
- Sampling accessories

Urine vacuum containers

- 120 ml container for urine with test tube aspiration
- In polypropylene
- Screw cap
- With writing area

Code	Volume (ml)	Sterile	Material	Packaging	Sales units
BSC202	120		PP	Bulk	300
BSC201				Single	250
BSC203		X		Bulk	300
BSC200		X		Single	250

3000 ml containers with sampling probe

Containers for collecting and storing urine 24 hours.

- With ergonomic handle
- Graduated
- Amber colour for photosensitive analysis
- Screw cap with vacuum test tube aspiration device
- With 185 mm sampling probe
- Vol. 3000 ml
- Dim. 125 x 125 x 245 mm
- In polyethylene

Code	Model	Vol. (ml)	Grad.	Material	Sales units
BSL489	Rectangular	3000	X	polyethylene	30

Vacutainer urine tubes

- In a 100-piece polystyrene foam rack
- Sterile
- Pre-labelled

Code	For ml of urine	Bottom	Dim. (mm)	Boric Acid	Cap Colour	Sales units
BV057R	4	Cylindrical	13 x 75		Yellow	100
BV058R	6	Cylindrical	13 x 100			100
BV059R	10	Cylindrical	16 x 100			100
BV060R				X		100
BV079R	9	Conical	16 x 100			100

Urine vacuum sampling probes

- Available in 2 versions:
 - with tube length 90 mm
 - with tube length 170 mm

Code	Description	Packaging	Sales units
BSS465	90 mm sampling probe for urine containers up to 200/250 ml	bag of 100 pcs	1000
BSS466	170 mm sampling probe for 24-hour urine containers	bag of 100 pcs	800

2.2_VACUMED® VENIPUNCTURE SYSTEM

- In a 100-piece polystyrene foam rack
- Pre-labelled
- Sterile
- PET test tubes

- With pre-calibrated aspiration
- Standard dimensions that ensure compatibility with all analysers, centrifuges and minor laboratory instrumentation

2.3_SAMPLING SET

Butterfly needles

Butterfly needle with protection device

- Ensures excellent venipuncture with minimum resistance to penetration and maximum operator safety
- The design combines safety with simple and safe ease of use
- The stainless steel needle is ultra-thin walled, ultrasonically polished, internal and external siliconizing, special ultrasonic sharpening with triple facets to ensure trauma-free injection
- Sterile
- Nipro®

Code	Description	Tube (mm)	Colour	Sales units
BV100	19G X 3/4" (19mm)	300	Cream	50
BV101	21G X 3/4" (19mm)	300	Green	50
BV102	22G X 3/4" (19mm)	300	Black	50
BV103	23G X 3/4" (19mm)	300	Blue	50
BV104	25G X 3/4" (19mm)	300	Orange	50

Standard butterfly needles

- The Nipro® Butterfly Needle (Scalp Vein Set) ensures excellent venipuncture with minimal penetration resistance and maximum operator safety.
- 21, 23 or 25 G
- Sterile
- Nipro®

Code	Needle (G)	Tube (mm)	Colour	Sales units

2.4_VENIPUNCTURE SET

Syringes and needles

PIC® sterile syringes with needle for insulin

Sterile disposable syringe with needle, non-pyrogenic, non-toxic, U-100.

- Latex-free rubber plunger
- Highly transparent polypropylene
- Highly legible and stable graduated scale
- In individual "Peel Pack" blister pack
- Coloured plunger to identify U-100 insulin

Code	Model	Cone	Needle (G)	Pack.	Sales units
BSS133/A	PIC® syringe for insulin U100 1ml u100 g26x1/2"	Luer	0.45 x 13 mm	100	800

Nipro® syringes

- In transparent medical grade polypropylene with thermoplastic elastomer sealing gasket
- Colour-coded needle cone
- Black graduated scale, clearly visible
- Latex-free
- Sterile in individual packs

Code	Model (ml)	Luer cone	Needle (G)	Sales units
BSS134	2-2.5 (g: 0.1-2.5/3)	Central	22G 1-1/4" black	100
BSS135	2-2.5 (g: 0.1-2.5/3)	Central	-	100
BSS136	5 (g: 0.2-5/6)	Central	-	100
BSS140	5 (g: 0.2-5/6)	Central	21G 1-1/2" green	100
BSS137	10 (g: 0.2-11/12)	Central	-	100
BSS141	10 (g: 0.2-11/12)	Central	21G 1-1/2" green	100
BSS130	20 (g: 1-20)	Eccentric	-	50
BSS131	50-60 (g: 1-50/60)	Eccentric	-	30

Terumo® syringes

- PVC-free and Latex-free syringe
- Black graduated scale, with wear-resistant graduation, clearly visible
- Individual packaging in sterile blister packs
- Needle with transparent cone and colour code, for immediate identification of the flashback and the size (Gauge)
- Blister pack with colour code indicating the size (Gauge) of the assembled needle

Code	Model (ml)	Luer cone	Needle (G)	Sales units
BSS216	5	Central		100
BSS110	20	Eccentric		50
BSS111	50 - 60	Eccentric		100
BSS114	2.5	Central	22 G 1-1/2" - black	100
BSS120	5	Central	22 G 1-1/2" - black	100
BSS121	10	Central	22 G 1-1/2" - black	100

Nipro® needles

- Cannula: the stainless steel needle has a much thinner wall than standard needles
- Transparent cone with colour code: the transparent cone in polypropylene with colour code allows quick flashback confirmation and unique identification of the size (Gauge)
- From 18 G to 27 G
- Sterile

Code	Needle (G)	Size	Colour	Sales units
BSS230R	18	1-1/2" (38)	Pink	100

ESR system

ESR glass pipettes

The pipette can be used to draw blood from any type of test tube. The aspiration system is direct and allows the operator, by pulling the internal plunger upwards, to raise the column of blood to "0", with automatic stop. The pipette has a graduated scale from "0" to "180" and therefore, as it is transparent, the reading is immediate. The support has 10 numbered positions and ensures the pipette is perfectly vertical.

- Transparent glass tube
- Graduation 0-180 ml
- With polypropylene plunger

Code	Description	Dimensions (mm)	Graduation (mm)	Scale distance (mm)	Internal packaging	Sales units
BSV012	ESR glass pipette, graduated with polyethylene plunger	L 210, Ø 4.45	0 - 180	10	500	2000

ESR plastic pipettes

Disposable pipette specific for determining the erythrocyte sedimentation rate according to the Westergren method. At the upper end the pipette is equipped with a fibre cap that allows automatic reaching of the "0" level simply and safely. In the lower part, at a precise distance (49.5±1 mm. from the bottom), it is equipped with a plunger that allows rapidly filling the pipette through the pressure exerted inside the test tube.

- Graduation from 0 to 170 mm
- In Polystyrene

Code	Description	Dimensions (mm)	Graduation (mm)	Sales units
BSV0123P	ESR pipettes in polystyrene graduated with plunger	L 230, Ø 4.45	0 - 170	800

ESR test tube

NA CITRATE Test tube, ideal for ESR System.

Code	Description	Sales units
BSV0121	Na Citrate test tube 0.106 ml. 12x55, pierceable black cap, for 1 ml of blood	1000
BST128	Test tube with 0.25 ml of Na Citrate Ø 12 x 56 mm, pink cap, labelled, in polypropylene. Non-pierceable cap Double indicating arrow at 1 ml and 2.25 ml	1500

Rack for ESR pipettes

Rack for 10 ESR pipettes with support clamps. This unique rack has the feature of supporting the ESR pipettes in a perfect vertical position.

- In ABS
- With 10 places
- White colour
- With support clamps

Rack

Code	Description	Material	Sales unit
BSV011	10-place ESR system rack in ABS	ABS	5

2.6_SAMPLING ACCESSORIES

Various sampling accessories

Disposable gloves

- MD CLASS I and PPE CATEGORY III
- Protection from biological agents, accidental contact with chemical substances
- Suitable for exploration, examination, medication, therapy, diagnostics, laboratory
- In powder-free latex or nitrile

Paper roll

- 4 Kg paper roll
- Ideal for laboratory use
- Packs of 2 rolls
- Euro Wiper Pure paper
- Length 304 m (approx.)

Code	Description	Sales units
BES12424	4 Kg paper roll, (800 tears)	2

Powder-free nitrile gloves

Code	Model	Size	Material	Sales unit
BSI080R	Powder-free	XS	Nitrile	200
BSI081R	Powder-free	S	Nitrile	200
BSI082R	Powder-free	M	Nitrile	200
BSI083R	Powder-free	L	Nitrile	200
BSI084R	Powder-free	XL	Nitrile	200

Powder-free latex gloves

Code	Model	Size	Material	Sales units
BSI034R	Powder-free	XS	Latex	100
BSI035R	Powder-free	S	Latex	100
BSI036R	Powder-free	M	Latex	100
BSI037R	Powder-free	L	Latex	100
BSI038R	Powder-free	XL	Latex	80

Plaster roll

- Dimensions 25 mm x 9.14 m
- In non-woven fabric

Code	Description	Sales units
BES13000	Plaster roll in non-woven fabric	10

Parafilm

Stretch film designed for closing laboratory containers.

- Thickness: 200 µm
- Liquid-proof, gas-permeable
- Use temperature: from -10°C to +60°C

Code	Description	Width (cm)	Length (m)	Sales units
090260	Parafilm ultra-stretch	10	38	1

Tourniquet

- In latex
- MD device class I non-sterile
- Internal diameter: mm 6 ±5%
- External diameter: mm 8 ±5%

Code	Description	Colour	Dimension (mm)	Sales units
ABS022	Round tourniquet, in natural latex, hemmed at the ends	Yellow	350 ± 5%	100

Bibula paper

- Filter paper 50 x 50 cm
- In 500-sheet boxes
- 67g paper

Code	Description	Sales units
ABS273	Extra-fast bibula paper 50 x 50 cm	500

2.6_SAMPLING ACCESSORIES

Simply Gel

SIMPLY GEL is a hydro-alcoholic gel specifically designed for hand antiseptics by simple rubbing, without the use of water. The use of a hand disinfectant is a very effective way to prevent infections. The presence of alcohol gives the product the unique property of containing the microbial flora of the skin (99%).

- Moisturises
- Protects against mechanical and chemical irritation
- Keeps the skin perfectly soft and supple

Code	Description	Sales units
BS3006	SIMPLY GEL 1000 ml with screw cap and ring seal and 2 dosing dispensers	12 bottles
BS3065P	SIMPLY GEL 500 ml with screw cap and ring seal and 4 dosing dispensers	12 bottles
BS3002	SIMPLY GEL 100 ml bottle with flip-top cap	12 bottles
BS3008	SIMPLY GEL 5-litre canisters	4 canisters

Lysonox® H2O2 ULTRA

Broad-spectrum disinfectant and detergent based on 5% hydrogen peroxide in synergy with alcohol. The biocide pool of the product makes it very active, also covering the sporicidal activity (high level disinfection) when needed. The product used for all compatible surfaces and furnishings does not need to be rinsed, thus eliminating any possible problem regarding contact times.

Lysonox® SURFACES

Neutral pH foaming disinfectant and detergent with bactericidal, fungicidal, mycobactericidal and virucidal activity. Suitable for all surfaces and furnishings, even the most delicate. NO RINSING REQUIRED. Its certified activity on Viruses and on highly resistant strains such as Mycobacteria, makes it suitable for reducing the pathogenic load according to what is reported in the ministry document.

Code	Description	Bottle containing	Sales units
BS0506	Lysonox h202	1l	12

Code	Description	Bottle containing	Sales units
BS0231	Lysonox surface	750 ml	12

Aniosafe high frequency gentle soap

- For simple hand washing in hospital toilet facilities
- Recommended for frequent use, it is suitable for sensitive skin
- Formulated without cleansing agents, rich in moisturisers
- Protective effect against microbial pollution
- Dermatologically tested
- Suitable for sensitive skin and frequent use

Code	Description	Sales units
AN1918229	1l bottles with screwed-in dispenser	4

3.1_BIOLOGICAL SAMPLES

A wide range of certified transport containers. These containers are designed to protect samples and prevent spills, damage and contamination during transport.

- CPT container transport system
- Vacuette® sample transport system
- Blood component transport system
- First aid backpacks
- Bags and Pouches
- Cooling Elements

In accordance with the ADR/RID, IATA, IMDG Code and ICAO-TI Regulations, the packaging for shipping Biological Substances Category B (UN 3373) must consist of 3 components:

Primary Packaging

It is waterproof, it resists a pressure difference of at least 95kPA

Secondary Packaging

It is waterproof, it contains foam and absorbent material

Tertiary Packaging

Container or bag for insulated transport with the symbol "UN 3373" printed together with the text "Biological substance, Category B"

CPT tertiary containers

Bags for transport of samples, suitable for CPT secondary container

Biological sample protection and transport system for safety containers UN3373 - biological material Category "B", non-autoclavable, cold sterilisation.

- Exterior in 600/900 Polyester coated with PVC
- Interior in 210/210 Nylon coated with PVC
- Rigid heat-insulating structure with Elastolen padding
- Zip closure
- Internal pocket for housing cooling elements
- External document pocket
- Symbols: UN3373 - Biological Material Category "B"
- Can be disinfected with aqueous solutions of the most common disinfectants
- Can be sterilised with aqueous solutions of cold sterilisers
- Washable at 40°C
- Colour Blue

Code	Capacity	Dimensions (cm)	Internal pocket for	Sales units
BS130413	1 container BS472041	21 x 26 x 36	1 cooling element	1
BS130414	2 containers BS472041	28 x 40 x 36	2 cooling elements	1
BS130415	3 containers BS472041	61 x 38 x 27	3 cooling elements	1
BS720204	4 containers BS472041	35 x 38 x 39	4 cooling elements	1

CPT secondary containers

CTP secondary container for transport of test tubes within/outside hospitals

Secondary container with handle equipped with sponge for 78 test tubes.

- Complies with the O.G. 236/99 guidelines for the transport of antiplastic drugs (Provision 5 August 1999)
- Hermetically sealed to prevent accidental leakage of biological fluids
- Quick and safe closure by applying pressure on the lid equipped with a handle
- Shock resistant to protect the operator in the event of an accidental fall
- Transparent material for constant control of the integrity of the contents
- Can be disinfected and sterilised to avoid contamination
- Internal pocket for cooling element
- Equipped with absorbent material on the bottom to contain accidental leakage of biological liquid
- Supplied with sponge for 78 blood sample test tubes

Code	Description	Dimensions (mm)	Sales units
BS472041	Transport Container for 78 Test Tubes (CTP)	310 x 155 x 180	1

Accessories for CPT containers

Reversible Rack

Reversible rack for 84 blood sample test tubes or 42 blood sample test tubes + 4 urine containers.

- Suitable for BS472041 transport container for test tubes (CTP)
- In polypropylene
- Can be disinfected and autoclaved up to 121°C
- Colour Blue

Code	Description	Dimensions (mm)	Sales units
BS00102	Reversible rack for 84 blood sample test tubes or 42 blood sample test tubes + 4 urine containers.	270 x 125 x 110	1

Absorbent sponge rack

For the secondary container BS472041.

- In polyurethane
- For 3 capacities: 6, 18 or 78 containers

Code	Holes	Capacity	Transport	Dimensions (mm)	Sales units
BS390078	78	1 container BS472041	Test tubes	28 x 12.8 x 6	1
BS390079	6	1 container BS472041	Urine containers, bottles	28 x 12.8 x 6	1
BS390080	18	1 container BS472041	Histology containers	28 x 12.8 x 6	1

3.2_BIOLOGICAL SAMPLES VACUETTE

Vacuette® tertiary containers

Bags for samples transport

- Exterior in 600/900 Polyester coated with PVC
- Interior in 210/210 Nylon coated with PVC
- Semi-rigid heat-insulating structure with 8 mm Elastolen padding
- Zip closure
- Internal pocket for housing cooling elements
- External document pocket
- Symbols: UN3373 - Biological Material Category "B"
- Can be disinfected with aqueous solutions of the most common disinfectants
- Can be sterilised with aqueous solutions of cold sterilisers
- Washable at 40°C
- Colour Blue

Code	Capacity	Dimensions (cm)	Internal pocket for	Sales units
BS720201	1 container 40 test tubes	28 x 18 x 21	1 cooling element	1
BS720202	2 containers 80 test tubes	32 x 30 x 22	2 cooling elements	1
BS720203	3 containers 120 test tubes	43 x 30 x 20	3 cooling elements	1
BS720206	6 containers 240 test tubes, with shoulder strap	42 x 30 x 38	4 cooling elements	1
BS720205	1 container 12 test tubes	12 x 13	1 cooling element	1

Vacuette® secondary containers

Vacuette® VTC secondary container for 12 test tubes

VACUETTE® Transport Container (VTC) with sponge insert for 12 test tubes.

- Practical polypropylene container with a diameter of 113 x height of 180 mm
- For the transport of up to 12 test tubes
- With screw cap and absorbent pad
- Foam insert suitable for tubes with a diameter of 9 to 16 mm
- Secondary container for the transport of biological samples
- In polypropylene
- For 13x75 - 13x100 - 16x100 test tubes

Code	Description	Dimensions (mm)	Sales unit
BS800110	Container for 12 Test Tubes	113 x 130	1

Secondary containers for 40 test tubes

Secondary container for the transport of biological samples with foam insert for 40 test tubes.

- In polypropylene
- With silicone seal
- Supplied with absorbent sponge for 40 test tubes
- With absorbent cloth
- With snap closure with hooks
- Storage temperature from -18°C to +50°C
- Complies with ADR/RID (packing instruction P650), IATA-DG, ICAO-CODE and IMDG-CODE

Code	Description	Dimensions (mm)	Sales units
BS472040	Vacuette® secondary container for 40 test tubes	270 x 125 x 180	1

Vacuette® accessories

Absorbent test tube holder for secondary container

Code	Places	Suitable for	For the transport of	Sales units
BS800101	12	BS800110	Test tubes	1

Cooling Elements

Ice packs

Cooling elements for tertiary transport bags.

Code	Description	Dimensions (mm)	Sales units
BS4800	Thermal pack suitable for BS720205	Ø 110	1
BS4900	Thermal pack suitable for tertiary container	L220 x W120 x H11	1

Tertiary containers for blood components

Isothermal semi-rigid tertiary containers for the transport of blood components

- Very light and easy to handle semi-rigid tertiary containers
- Equipped with an internal isothermal lining in aluminium and expanded polyethylene, which ensures temperature maintenance for medium-length journeys
- The containers are registered with the Medical Devices Directory as Class I Medical Devices
- A cooling plate can be inserted into the special pocket on the lid in order to increase the capability of maintaining the temperature
- Equipped with an external document pocket
- All components are latex-free

Code	Description	Size	Dimensions (mm)	Plate (ml)	Sales units
BS4005	EMO 101 Semi-rigid tertiary container	Small	280 x 200 x 190	200	1
BS4006	EMO 102 Semi-rigid tertiary container	Medium	280 x 260 x 190	400	1
BS4007	EMO 103 Semi-rigid tertiary container	Large	410 x 260 x 210	800	1

Cooling elements for transport at controlled temperatures

Ultra-flat eutectic plates for the transport of biological samples, drugs and blood components.

- Plate: Polyethylene
- Liquid: Mixture of water and salts

Code	Description	Dimensions (mm)	Weight (g)	Sales units
BS4008	Eutectic plate for container "EMO 101" BS4005	160 x 110 x 14	200	1
BS4009	Eutectic plate for container "EMO 102" BS4006	250 x 140 x 14	410	1
BS4010	Eutectic plate for container "EMO 103" BS4007	320 x 240 x 14	820	1

Secondary containers for blood components

Secondary containers for transporting blood components

Hermetically sealed secondary containers for the transport of blood and blood components. Approved for the transport of bags of whole blood, processed blood, platelets and plasma. Made of ultra-resistant polycarbonate and equipped with an isothermal coating in expanded polyethylene to maintain the temperature.

All containers are hermetically sealed

- Autoclavable at max 121°C

All containers are complete with:

- Handle and hooks
- Internal perforated plexiglass tray for housing cooling plates
- Silkscreen printing showing the symbols required by current legislation

Compliance with regulations:

- UNI EN 829/98 (drop tests)
- A.D.R. (European Agreement concerning the International Carriage of Dangerous Goods by Road) - Instructions for use P650

Code	Description	Size	Compatibility	Sales units
BS4011	Secondary container in PC for the transport of blood components	Small	For container EMO 101 BS4005	1
BS4012	Secondary container in PC for the transport of blood components	Medium	For container EMO 102 BS4006	1
BS4013	Secondary container in PC for the transport of blood components	Large	For container EMO 103 BS4007	1

Safety bags approved for the transport of blood components

Hermetically sealed bags for the transport of blood components made of excellent quality HDPE, transparent to check for any internal spills and with maximum resistance to tears.

- Made of HDPE with a thickness of 70/90 microns
- Hermetic seal guaranteed by the patented Debasafe technology, with double stitching
- Liquid-proof
- Practical tear-off opening, without the need for blades/sharp objects
- Very wide and tamper-proof VOID edge gluing band
- Maximum resistance to lacerations and tears
- External document pocket
- Numbering with unique barcode for each bag
- Handle for easy transport (only code BS4004)

Code	Dimensions (mm)	Thickness (µm)	Sales units
BS4002	225 x 410	70	500
BS4003	300 x 450	70	500
BS4004	540 x 520	90	200

3.4_ACCESSORIES

Bags for transport of samples

Bags for transport of samples

Double pocket bags for the transport of biological samples separated from their documents.

- "Biohazard" Symbol
- In polyethylene
- Zip closure
- Available in 8 colours

Code	Colour	Dimensions (cm)	Sales units
BSA2401	Transparent	16 x 16 x 23h	1000

Urinalysis

Urinalysis strips

- 2- or 10-parameters reactive strips

Code	BSD742	BSD749SG
Number of Parameters	2	10
Description	KET Ketones GLU Glucose	LEUC Leucocytes NIT Nitrites UR Urobilinogen PR Proteins PH PH BLOOD Blood SG Specific weight KET Ketones BIL Bilirubin GLU Glucose
Format	Strip	Strip
Positive control	No	No
Negative control	No	No
Sales units	1 pack of 100 strips	1 pack of 100 strips

Ideal articles for occupational medicine

Safety pouches

Numbered tamper-evident pouches.

- Made with an ultra-resistant glue.
- Double numbering: one on the part that must be sent, and the other on the control coupon that will remain in your hands.
- Once the glue has set, there is no way to open it without leaving obvious signs of tampering

Code	Colour	Dimensions (cm)	Sales units
BSA2350	White	235 x 320 + 30 + 30	500

Enrichment system

Biorepair, optimised system for the concentration of parasites in stool.

The kit includes:

- 50 test tubes with filter
- 50 test tubes pre-filled with Bailenger solution with spoon cap
- 100 ml bottle of reagent B (Ethyl Acetate)
- 15 ml bottle of reagent C (Lugol)

Code	BSD855/E
Description	Biorepair - Faecal parasite enrichment system + ethyl acetate + lugol
Sample	Stool
Positive control	No
Negative control	No
Cut-off	NA
Format	NA
Sales units	1 pc

Adulteration strips

- The strip test allows checking for any adulteration of urine samples subjected to analysis to detect drug abuse.
- The test allows detecting 7 parameters: Creatinine, Nitrites, Glutaraldehyde, pH; specific weight; Bleaching agents and Pyridinium.

Code	BSD913
Description	Urine adulteration
Sample	Urine
Positive control	No
Negative control	No
Sales units	1 pack (25 strips)

Tamper-evident labels

Tamper-evident labels designed for the dual signature of the patient and operator.

Suitable for application on smooth or satin surfaces in plastic, metal, glass, paper/cardboard.

Permanent adhesive. When the label is removed, 'triangles' appear on the surface to highlight any tampering with the container.

Code	Colour	Dimensions (mm)	Sales units
BS0071	Silver	23 x 160	1000 (250 4-label sheets)

INSTRUMENTATION

5

SECTION TABLE OF CONTENTS

Explore our catalogue some of the laboratory instruments, with stirrers, vortex mixers and bench microcentrifuges to handle samples with maximum efficiency; integrated workstation for advanced experiments.

In addition, our high-quality laboratory glassware, ideal for safe and precise handling of chemical solutions.

To explore the full range of equipment and instruments, we invite you to visit the dedicated page on www.biosigma.com

	Digital	Touchscreen	Digital	Analogue

* only for low speed applications.

Programmable rotary stirrers

- Advanced programming, with a wide choice of rotation modes
- 360° rotation, complete or interrupted by pauses and mixing intervals
- Suitable for use in cold rooms and incubators
- Optional plate for tilting function

Code	062649CL	062650CL
Model	Programmable rotary stirrer	Programmable mini rotary stirrer
Speed (rpm)	1 - 80	
Stirring angle	Up to 360°	
Accessories included	5 racks for 6 1.5 ml test tubes 8 racks for 1 15 ml test tube 2 racks for 150 ml test tube	2 racks for 6 1.5 ml test tubes 2 racks for 1 15 ml test tube 2 racks for 150 ml test tube
Timer	From 1 s to 99 h 59 min or continuous	
Use temperature	from +2°C to +70°C	
Dim. (l x d x h) (mm)	410 x 137 x 199	290 x 137 x 199
Weight (kg)	2.27	1.8
Power supply	100 - 240 V, 50 - 60 Hz, 3 A

062657	Rocker plate dimensions 152 x 127 mm	1

Rotary stirrer

- Adjustable mixing speed and angle
- Sequential and reversible rotation (rotation up to 360°C and then inversion)
- Clip with anti-slip coating

3 carousels included:

- 48 x 1.5 ml
- 20 x 15 ml
- 12 x 50 ml

Code	062646CL
Speed	40 rpm
Tilt	Variable (0-90°)
Capacity (ml)	12 x 50, 20 x 15, 48 x 2
Timer	Continuous / 1 second every 9 hours
Use temperature	4°C / 65°C
Dimensions (mm)	21 x 27 x 32
Weight (kg)	3.2
Power supply	100V - 240V; 50 - 60Hz; 25W

Mini magnetic stirrer

Code	062703CL
Capacity (l)	1.5
Speed (rpm)	100 - 1500
Plate dimensions (cm)	8.5 x 8.5
External dimensions l x d x h (mm)	120 x 120 x 30
Weight (kg)	0.2
Use temperature	Max 45°C
Power supply (W/V/Hz)	2 / 240 / 50 - 60

Miniaturised vortex mixer

- Miniature model
- Pressure activation

Code	062599CL
Speed (rpm)	2800
Width (mm)	4
Use temperature	4°C / 65°C
Dimensions (l x d x h) (mm)	94 x 99 x 66
Weight (kg)	0.4
Power supply	100 - 240 V / 50 - 60 Hz

Lab Basics microcentrifuge

- Ideal for concentrating drops at the bottom of the test tube
- Compact
- Silent (≤ 45 dB)
- Easy to use: automatic start and extension when opening/closing the lid
- Tool-free rotor change
- Supplied with: a) 1 rotor for 8 0.2 / 0.5 / 1.5 / 2.0 ml microtubes
b) 1 rotor for 4 strips of 8 0.2 ml PCR tubes

Code	258253
Capacity	8 microtubes or 32 0.2 ml PCR tubes
Speed (rpm)	7000
RCF acceleration (g)	2680
External dimensions l x d x h (mm)	160 x 170 x 122
Weight (kg)	0.5

ClearLine® microcentrifuge

- For 5 ml and 1.5 / 2 ml microtubes
- Adapter for 12 x 75 mm tubes included
- Starts and stops by closing or opening the lid

Code	062586CL
Capacity	4 5 ml microtubes and 4 1.5 / 2 ml microtubes
Speed (rpm)	5500
RCF acceleration (g)	2000
External dimensions l x d x h (mm)	140 x 200 x 112
Weight (kg)	1
Power	100 - 240 V/50 - 60 Hz/300 W
Power supply (W/V/Hz)	2 / 240 / 50 - 60

DNA and PCR workstations

- UV chamber with bactericidal UV lamps with 254 nm wavelength
- Models with glass or plexiglass walls
- Digital timer
- Internal lighting: white light (15 W lamp)

Ideal for safe sample preparation:

- UV radiation disinfects the internal surface, deactivating any DNA/RNA molecule, in 15-30 min
- automatic switch-off of radiation when the door is opened
- bactericidal chamber decontamination system, by means of clean air circulation

Code	490005	490005B	712247
Model	Plexiglass	Glass	Glass 1200 mm
UV radiation			
Wavelength	+/- 253.7 nm		
UV lamps	1 x 25 W		2 x 30 W
UV intensity	15 mV/cm ² /s

INDUSTRY 4.0

Automated industrial production

Fully automated production plant with bidirectional data interconnection between Machines and the Company ERP System.

The new system that allows everyone to see the status of all machinery in real time, with a convenient Web panel, in ERP or spreadsheets.

- New MES IOT system
- Real time monitoring of all machinery
- Progress, programming, events, everything tracked
- Complete traceability of raw materials
- Resource management with MRP and Scheduler

WAREHOUSE

WMS with MRP procedures

Our only goal: to satisfy our customers by totally complying with our commitments.

We are prepared and structured to support our customers in the long term:

- Innovative, proactive, reactive, reliable, traceable logistics, with immediate deliveries
- The largest stock of consumables and materials in Europe
- Optimisation of flows, order preparation and storage location
- New WMS system with MRP logic
- Availability and real-time accessibility of high-quality information for all
- Ability to absorb business growth.

CSR

Social and Environmental Responsibility Data protection, security and privacy

We are committed to protecting our employees, promoting their well-being in the workplace, valuing them and encouraging their development, but also promoting social dialogue and good management practices.

- Protecting the health and physical integrity of employees
- Fighting any form of discrimination
- Promoting well-being in the workplace through respect for the balance between private and professional life
- Valuing and developing our employees through opportunities, training and support
- Promoting social dialogue
- Data protection security measures - security policy
- Business Continuity Plan
- Database RTO and RPO

OUR WEB SERVICES

On the website www.biosigma.com, you can find a vast selection of over 100,000 items from more than 140 different brands. BIOSIGMA is part of a group that is rapidly emerging as one of the largest distributors of scientific materials and instruments in Europe. Shipments of items available in stock are made within a maximum period of 3-5 days and cover the entire Italian territory.

VIDEO

Here you will find all the videos of the products in our catalogues, sorted by chapter.

PRODUCT GUIDES

Guides in PDF format, sorted by chapter, are available for many products. They can be consulted by typing the product code in the search bar on the home page.

Catalogues / Promotions

Our catalogues and promotions are available online.

TECHNICAL INFORMATION SHEET FOR THE MATERIALS USED

CYCLIC OLEFIN COPOLYMER (COC)

Thermoplastic resin with low dielectric constant, without dielectric tangent, special quality for high frequency with low water absorption, low specific gravity, high resistance to rewashing, excellent transparency, particularly suitable to produce reading cuvettes for specific instrumentation.

POLYETHYLENE (PE)

Thermoplastic polymer, slightly opaque, light, unbreakable, excellent chemical resistance, good resistance to solvents, particularly suitable to produce Pasteur pipettes and caps for test tubes.

POLYMETHYL METHACRYLATE (PMMA)

Acrylic resin, transparent, rigid, very similar to glass in laboratory uses. It is well suited to create reading cuvettes for scientific instruments and test tubes for blood samples.

POLYOXYMETHYLENE (POM)

Product obtained from the polymerisation of formaldehyde, light, unbreakable, excellent chemical resistance to bases and solvents used in pathological anatomy.

POLYPROPYLENE (PP)

Thermoplastic polymer, slightly opaque, excellent chemical resistance to solvents; resists autoclave sterilisation at about 120°C, excellent resistance to centrifugation. Particularly used to produce biological containers and test tubes.

POLYSTYRENE (PS)

Thermoplastic polymer, transparent, used in the medical field for highly transparent products. Low resistance to solvents and centrifugation. Used in the chemical-clinical field for sample cups and test tubes.

POLYCARBONATE (PC)

Thermoplastic polymer whose transparency and absence of colour allow a permeability to light of 89% in the visible spectrum. Its transparency, combined with its mechanical properties, makes it the natural substitute for glass, but much more resistant to cold (it resists water below 70°C and nitrogen in the gaseous phase at -196°C). Used for Biobox 81.

MEDICAL GRADE POLYETHYLENE

This polymer is intended to produce medical and medical-related items. It is characterised by a high ESCR (Environmental Stress Cracking Resistance). Products manufactured with this type of raw material can be sterilised with ethylene oxide or with radiation up to 35 kGy without yellowing problems. This raw material has been tested in accordance with: the United States Pharmacopoeia (USP) and has a Drug Master File (DMF) at the FDA.

MEDICAL GRADE POLYPROPYLENE

This polymer is intended to produce medical and medical-related items. It is characterised by easy workability, high transparency and gloss, can be sterilised with radiation up to 25 kGy, without yellowing problems and has excellent chemical resistance. This raw material has been tested in accordance with: the United States Pharmacopoeia (USP) and has a Drug Master File (DMF) at the FDA.

Notes:

All the technical information reported is indicative and does not imply any responsibility on the part of Biosigma. All the information relating to the resistance of plastic materials to high temperatures and sterilisation has been formulated based on the reports of the plastic material manufacturers.
